CONTENTS

Chapter 1	Aim and introduction to the thesis	9
Chapter 2	New advances in the pathogenesis of ANCA-associated vasculitides	19
Part I	Pathogenetic aspects of ANCA-associated vasculitis: role of complement	
Chapter 3	Review article: Pathogenic role of complement activation in anti-neutrophil cytoplasmic autoantibody-associated vasculitis.	37
Chapter 4	Complement deposition in renal histopathology of patients with ANCA-associated pauci-immune glomerulonephritis	57
Chapter 5	Complement activation is involved in renal damage in human antineutrophil cytoplasmic autoantibody associated pauci-immune vasculitis.	71
Chapter 6	C5a mediates neutrophil activation in ANCA-associated vasculitis through p38 mitogen-activated protein kinases pathway	91
Part II	Clinical aspects of ANCA-associated vasculitis and pauci-immune crescentic glomerulonephritis	
Chapter 7	ANCA-negative pauci-immune crescentic glomerulonephritis	107
Chapter 8	Severe pulmonary hemorrhage in patients with end-stage renal disease in ANCA-associated vasculitis.	121
Chapter 9	Characteristics of relapses in patients with antineutrophil cytoplasmic autoantibody associated vasculitis: likely to begin with the same organ as initial onset.	131
Chapter 10	Circulating neutrophil gelatinase associated lipocalin: a useful biomarker for assessing disease activity of ANCA-associated vasculitis.	139
Chapter 11	Follow-up of avidity and titer of anti-myeloperoxidase antibodies in sera from patients with primary ANCA-associated vasculitis	151
Chapter 12	Summary	163
Chapter 13	Nederlandse Samenvatting	173
